# SUNSPACE FARM CO., LTD.

## TOWER SMART FARM

*Complete Assembly*

### Tower Smart Farm

**The Smart Rotating Vegetable Tower System** is a vertical farming technology designed to maximize space efficiency, making it suitable for vegetable cultivation in limited areas or controlled environments. The system consists of a 12-tier hydroponic growing tower, integrated with a recirculating water system, DC water pump, and an automatic rotating motor, along with LED grow lights to ensure uniform light distribution for optimal plant growth.

***This technology helps reduce resource consumption, enables effective production quality control, and enhances food safety standards.***
